

Richer, warmer hair colour

—just shampoo it in with *Harmony*

DO YOU WISH your hair to gleam with subtle, flattering highlights? Wish your hair a deeper, more exciting colour? Perhaps you'd like to hide those first grey hairs? Then you want *Harmony*, the improved cream hair colorant, that's also a shampoo and a wonderful conditioner.

Safe, even colour

Harmony gives such wonderful results, because the colour is absorbed into the 'pores' of the hair, to blend smoothly and evenly. It's not like a harsh permanent dye—or like a temporary rinse either, which simply coats the surface of the hair and is apt to rub off and look uneven. In fact, *Harmony*

colour lasts through six to eight shampoos.

So quick—so easy

Harmony is so simple to use—there's no pouring colour through your hair, no dripping, no fuss. Just two lathers, and your hair is soft and shining with rich, warm colour.

The chart below helps you choose your *Harmony* shade. And for free advice on any aspect of hair colouring or styling, write to Jane Lindsay, 449 London Road, Isleworth, Middlesex.

Harmony

HAIR COLORANT

YOUR HAIR COLOUR	HARMONY SHADE

Relief at last from PILES

After suffering years

This London man is just one of many sufferers who are now getting real relief from piles, by using an ointment containing T.C.P.—the soothing, healing antiseptic. He writes:—

"For years I have suffered from piles and after trying all kinds of so-called remedies, I decided to give T.C.P. Ointment a trial, and was amazed by the result. I am now free from pain, and the swelling and burning has ceased... I shall certainly recommend it..."

R. D., Wood Green, N.22

In T.C.P. Ointment no less than 9 soothing, reducing and healing medicaments are combined with T.C.P. to give quick, lasting relief. The trial size costs only 2/2d. From your Chemist (with directions for Pile treatment and other uses). It's worth trying to-day!

Cassandra reports f

LIFE A

Santa Monica, California, U.S.A., Wednesday.

LESS than a quarter of a mile from where the long rollers of the Pacific Ocean hit the golden sands of California there is a large, low building constructed in the manner of a modern factory. It houses a group of people—some 500 persons—who are engaged in a strange and faintly sinister world of pure thought.

This is the Rand Corporation of America. The very best minds in the United States and men of great intellectual horsepower work here in an atmosphere of relaxed calm to advise the President and the U.S. Government on how to deal with this tormented world.

Pure Research

Rand is non-profit-making and is supported by outside grants. Its business is pure research conducted in a donnish atmosphere that disdains detail and revels in the wider strategy of the human mind.

Rand's first preoccupation is death. Death unprecedented. Death unimaginable. Death untold.

Here in these unlikely cloisters by the sea—with all the garishness of Los Angeles around and sited almost next to the Santa Monica Pier with its fishermen, its ruffians, its fish-and-chip shops and its bars—the best scientists, the best mathematicians and the best philosophers are working out the policy of conducting thermo-nuclear war.

To work at Rand is a coveted honour. Only the elite come here—the very best that the universities can provide.

The average age of the research workers

MEDICAL RESEARCH: Y intelligent men working on

is about thirty-five. They dress in conventional week-end clothes, they have the widest possible freedom to pursue ideas and, as they feel that human knowledge is a matter of mental freedom will find a physicist working with an economist, a political scientist arguing with a psychologist.

They have comfortable rooms to sleep in— all, incidentally, equipped with blackboards — and they meet in conference halls of considerable size.

Security measures against the entry of unwanted strangers equal those of the White House itself.

THE United States Air Force is by far the largest customer of Rand. The use of nuclear bombs, the gigantic apparatus of missiles on land, below the ground and in the air, of the sea are heavily influenced by

Rand's first preoccupation is death.
